OPERATION OF PIE WARMER

Rotate thermostat to desired operating temp - usually 85-90oC

Thermostat should cycle on and off to maintain this temp.

Pre-heat pie warmer before placing food inside.

As a guide pre-heat pie warmer on max temp setting for 20 mins.

After this period return to desired temp (65-75oC.)

Approximate times for products -

Meat Pies - 35-40 mins

Party Pies - 15mins

Sausage Rolls - 20 mins

Pasties - 15-20 mins

Quiche - 15 - 20 mins

Due to heat emission from the element and the thermal properties
of air, the hottest shelves in the warmer will be top and bottom.

If you can leave bottom shelf empty!

When new product is placed in the unit use top and bottom shelf,
rotate the product!
